

Fedor Rumiantsev

Frontend Developer

theorum@icloud.com | github.com/rmnfdrzq | [linkedin.com/in/felixxttd](https://www.linkedin.com/in/felixxttd)

Summary

Frontend Engineer with 3+ years of experience building high-traffic web applications in product companies, with a strong focus on performance, scalable frontend architecture, and UX/UI quality of user-facing interfaces.

Skills

Programming languages: JavaScript, TypeScript

Frameworks & styling: React, Next.js, Redux, Zustand, TanStack Query, CSS modules, Tailwind CSS

Development tools: Webpack, Vite, Git, Docker, Jest, Postman, Figma, Fetch/Axios, CI/CD

Other: REST API, HTTP, WebSockets, Agile, Scrum, unit testing, e2e testing, JWT

Professional Experience

Vodokomfort

July 2024 - March 2026

Large B2B company specializing in plumbing and heating equipment, operating nationwide.

Remote

Front-end Developer

Project: E-commerce Platform

Scalable e-commerce platform with over 35k monthly active users.

- Owned end-to-end development of high-conversion product listing pages, cart and checkout, defining caching and performance strategies aligned with UX and business requirements.
- Implemented hybrid rendering (SSR/CSR) and optimized data fetching, reducing server load by 28%.
- Worked closely with backend, product managers and designers to define API contracts, UX behaviour and scalable component architecture.
- Improved release stability and reduced production issues by introducing E2E testing for critical user flows and contributing to code reviews.

Tech stack: React, Next.js, TypeScript, Zustand, CSS Modules

Project: Equipment Catalog & Selection Tool

Corporate product catalog and engineering selection tool.

- Sole frontend owner, responsible for architecture decisions and delivery.
- Developed a complete authentication and registration flow, including OAuth (JWT-based) authorization, secure token handling, and role-based access control.
- Designed and implemented complex UI logic using 20+ reusable components, improving long-term maintainability through clear architecture and documentation.
- Collaborated with backend on API contracts and technical decisions significantly reducing integration issues.

Tech stack: React, Redux, TanStack Query (React Query), Recharts

SWOYS

July 2023 - June 2024

Product-focused company with a small cross-functional team and fast iteration cycles.

Remote

Frontend Developer

Production web platform for event planning and user engagement.

- Refactored a monolithic React codebase into a modular component structure, improving maintainability and development velocity.
- Optimized REST APIs, reducing redundant network requests and decreasing page load time by 35%.
- Improved form validation logic, reducing user errors by 40% and increasing form submission reliability.

Tech stack: React, JavaScript, TypeScript

R-top Digital

April - May 2023

Intern Frontend Developer

Nizhny Novgorod, Russia

- Built 5 responsive pages from Figma designs and contributed to a reusable UI component library.

Open Media

Jun - Jul 2022

Intern Frontend Developer

Nizhny Novgorod, Russia

- Improved performance of an audio player (CPU -30%, memory -40MB).

Education

Polytechnic University of Turin

Master of Computer Engineering, specialization in Software

Turin, Italy

2024 - Present

Kostroma State University

Bachelor of Information Systems and Technologies

Kostroma, Russia

2020 - 2024
